

PREPARED FOR

Water Fighters Restoration

Peoria / Greater Phoenix Valley, AZ · waterfighters.net · Live data pulled July 14, 2026

2.5/5

Strong reputation, weak discoverability. Water Fighters has the best rating in its market — but the customers who search organically, ask AI, or live outside Peoria can't find it. The reputation is earned; the visibility layer is missing.

Overall Visibility MIXED

#1 in the Peoria map pack — genuinely strong. But **not in the top 20 organic results** for "water damage restoration Peoria AZ," and absent from AI answers. Visibility thins fast outside the home city, despite serving the whole Valley.

AI Search Readiness CRITICAL

ChatGPT recommends **four competitors** — **including one with 4 reviews** — and never mentions Water Fighters. Root cause: the website serves AI crawlers a **blank 169-byte page** — no title, no headline, no content. To ChatGPT, the site doesn't exist.

Google Business Profile NEEDS WORK

Claimed, 24/7, 590 photos — good bones. Two locations (Peoria: 4.9★ / 124 · Phoenix: 4.7★ / 93) — but **the website doesn't give each location its own supporting pages**, and the profiles list dozens of services with no matching page on the site. Google and AI discount what they can't verify.

Reviews & Trust STRONG CORE

4.9★ is elite, and licensing/IICRC signals are all present. The gap is volume & velocity: ~217 reviews split across two listings after 15+ years in business. Competitors hold 199–480 on a single listing — and review count is a top map-pack ranking factor.

Website & SEO Foundation WEAK

Looks professional to humans; **invisible to crawlers that don't run JavaScript**. No organic rankings in the home market, and modest authority (75 referring domains). The blog exists but isn't earning positions.

Paid Coverage — LSA / Ads

OPPORTUNITY

LSA presence **didn't appear on the emergency searches we checked** — worth verifying coverage and budget across the Valley. LSA is pay-per-confirmed-lead, and with AI call screening, junk leads get disqualified and refunded — so existing LSA spend works harder.

The AI test — run live today

We asked ChatGPT: **"Who are the best water damage restoration companies in Peoria, Arizona? I have an emergency water leak and need someone now."**

It answered: **Peoria Water Damage Services** (5.0 — 4 reviews), **Premier Restorations**, **ServiceMaster All Care**, and **Drylux** (Gilbert — 40 miles away).

Water Fighters Restoration — the #1-rated company on the Peoria map — **was not mentioned**.

Homeowners are increasingly asking AI instead of Google. Right now, those emergency calls are being routed to competitors — including companies smaller and lower-rated than Water Fighters.

How the market sees it — Peoria, AZ

COMPANY	RATING	REVIEWS	PEORIA MAP PACK	CHATGPT
Water Fighters Restoration	4.9★	124 (+93 Phoenix)	#1	✗ Not mentioned
Peoria Water Damage Services	5.0★	4	—	✓ First pick
Premier Restorations	4.9★	81	#2	✓
ServiceMaster All Care	4.8★	107	—	✓
Drylux Restoration (Gilbert)	4.4★	480	—	✓

The best-rated company in the market is the only one on this list AI won't recommend — that's a fixable technical problem, not a reputation problem.

Biggest opportunities, in order

1 · Reputation consolidation

Strengthen both listings, then run a review reactivation campaign to past customers — you're sitting on hundreds of un-asked-for reviews.

2 · AI-readable rebuild

Rebuild the site so Google *and* AI crawlers can read every service and every Valley city — the fix for being invisible in ChatGPT, Gemini & AI Overviews.

3 · Claim the LSA auction

Launch Local Service Ads — pay only for confirmed leads, with junk calls disqualified so you're refunded.

The non-disruptive path

Everything that's working today keeps running — your team, your site, your campaigns. Rank AI adds the layer nobody's covering: **AI-search visibility, review growth, and every call answered.** One price, **\$997/month, no contract** — and the first **14 days are free**, so the results speak before a dollar is spent.
