

Get both brands found first — in Google *and* in AI search.

You're building two independent brands out from under the franchises — a restoration company and a moving & storage company. Both live or die by the same question: when a local homeowner asks "who's the best near me?", who gets named? This puts your name in front of that answer, on both sides of the business, for one flat price.

THE PROBLEM

Right now you're paying to compete in a race to the bottom — ~\$180–200 for a single LSA lead, plumbers wanting \$250 just for a referral, and franchise "advice" to spend \$15k/month on Google Ads that no independent operator can win. Meanwhile AI assistants have quietly become the new front door: they answer "near me" questions directly and only recommend businesses built with the right content, reviews, citations, and structured data behind them. If Damage Control and Carolina Boys aren't built to be **read and trusted by AI**, your competitors get recommended — and you never even see the lead.
